

JLG Forklift Part

JLG Forklift Part - After retiring in the late 1960's, John L. Grove started on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast marketplace for a product that could promptly and securely lift individuals in the air to accomplish upkeep and other construction services.

Following their return from vacation, John set up a partnership with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design essentials of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into many marketplaces globally and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
